

**WARNING**

**DISCONNECT POWER BEFORE RE-LAMPING OR WIRING THE FIXTURE
READ ALL INSTRUCTIONS COMPLETELY BEFORE STARTING INSTALLATION.**

**CAUTION**

- TO AVOID THE RISK OF FIRE OR SHOCK, FIXTURE MUST BE INSTALLED IN COMPLIANCE WITH ALL APPLICABLE NATIONAL AND LOCAL ELECTRICAL/BUILDING CODES.
- INSTALLATION AND MAINTENANCE OF THIS UNIT REQUIRES AN ELECTRICIAN OR CERTIFIED FACTORY TRAINED TECHNICIAN.
- If an existing fixture is being replaced, remove it and note to which of the wires in the outlet box the fixture was attached. DO NOT SEPARATE ANY OTHER WIRES THAT MAY BE IN THE BOX. DO NOT DAMAGE THE INSULATION OF OLDER WIRING. In regular circumstances the BLACK wire will be the "Hot" lead and the WHITE wire will be the "Neutral" or "Common" lead. A GREEN or BARE COPPER wire is the "Ground". In older buildings it is always good practice to reconfirm the polarity of the wiring.

NOTICE

- The important safeguards and instructions outlined on this sheet cannot cover all possible conditions and situations that may occur. It must be understood that common sense, caution and care factors that cannot be built into any product. Caution and care must be supplied by the person(s) installing, operating and caring of this lighting fixture.
- This fixture is designed to be mounted on a correctly installed standard round or octagon box or a through wiring box with a plaster frame. The box must be securely mounted to the structure of the building. The crossbar and hardware supplied should be used. Directly mounting the fixture to the outlet box may make it impossible to correctly align the fixture.
- This fixture is supplied with a 4-pcs. stem. There is one 6" section, two 12" section and one 18" section. This feature allows the fixture to be mounted with a stem up to 48" in length in 6" increments (See figure-2).
- This fixture is supplied with a swivel. By rotating the canopy the fixture may be mounted to angled ceiling.

FIXTURE PREPARATION

1. Remove the fixture, shade, glass/metal parts and parts bag(s) from the carton.

NOTICE:

**Before discarding the carton,
double check to make certain that all parts are found.**

FIXTURE INSTALLATION

1. Determine the overall desired length of the fixture. Assemble the stems one at a time onto the fixture leads. Tape the end of the leads to a stiff wire (coat hanger) to aid in pulling them through the stems. Place the canopy onto the stem before assembling the top stem section and swivel.
2. Attach the mounting plate to the outlet box. (the green screw should face the floor). Back out the screws $\frac{1}{2}$ turn to allow the ring to rotate.
3. Cut off the excess ground and fixture wire 6" beyond the canopy. Strip $\frac{1}{2}$ " of insulation from the ends of the wire. Twist the wire stands together.

FIGURE-1

4. Fasten the ground wire to the green or bare copper wire in the outlet box or the green screw on the mounting ring .

WARNING

**Never fasten the ground wire to the black or "hot" wire!
Failure to follow this instruction could result in
serious injury or death!**

5. Fasten the white fixture lead to the white wire in the outlet box.
Fasten the wires together with an approved fastener (wire nut).
Starting about 1" below the fastener, tightly wrap the connection
with electrical tape so that the connections seals the end of the fastener.

WARNING

**Make sure that there is no exposed wire or strands
that could cause a dangerous short circuit!**

6. Connect the black fixture lead to the black wire in the outlet box.
Fasten the joined wires as in step 5.
7. Using the ball nuts, loosely fasten the fixture to the mounting plate. Rotate and align the canopy as necessary .Tighten the flat screws.
8. Attach the center stem and place the glass column together with the stainless trim, place the end cap and screw the finial and lock bushing to hold the glass column in place (see figure-3).
9. Install the lamps (light bulbs). NOTE: This fixture is rated for 60 watts candelabra based type B lamp.

WARNING

DO NOT EXCEED RECOMMENDED WATTAGE!

10. Place the fabric shade, (See figure-3)
(Push and twist to lock the shade in place).
11. Restore power to circuit at breaker or fuse box.

NOTICE:

**Must use a ELV Dimmer with LED's on this fixture.
*Lutron Maestro dimmer not compatible.**

ADJUSTABLE STEM

LED DRIVER REPLACEMENT PROCEDURE

1. LOSE THE SCREWS TO REMOVE THE SHADE
2. REMOVE THE GLASS WITH TRIM ON TOP PORTION INCLUSIVE THE LED WITH HEATSINK
3. RE-WIRE THE CONNECTION OF LED DRIVER ON THE DISTRIBUTOR
4. LOSE AND REMOVE BOTTOM FINIAL TOGETHER WITH GLASS; OCTAGONAL TRIMS AND TUBING
5. PULL LED DRIVER FROM DISTRIBUTOR FOR REPLACEMENT
