

**GENERAL**

1. To ensure successful installation, the following instructions and diagram(s) should be read and understood.
2. All electrical connections must be made in accordance with the National Electric code and local codes and ordinances. If you are uncertain how to install electrical wiring and lighting fixtures, secure the services of a qualified licensed electrician.

**TOOLS NEEDED**

Blade screwdriver, phillips screwdriver, slip joint pliers or small adjustable wrench, wire cutter/stripper, electrical current tester, stepladder and electrical tape.

**INSTALLATION PREPARATION**

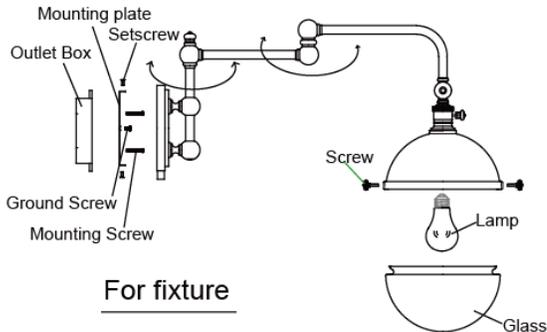

1. **TURN OFF THE ENTIRE ELECTRICAL CIRCUIT TO WHICH THE LIGHTING FIXTURE IS TO BE ATTACHED.** Turn circuit breaker to the off position or completely remove the fuse controlling the circuit.
2. If an existing fixture is being replaced, remove it and note to which of the wires in the outlet box the fixture was attached. **DO NOT SEPARATE MULTIPLE TWISTED WIRES THAT MAY BE IN THE BOX. DO NOT DAMAGE THE INSULATION OF OLDER WIRING.** In regular circumstances the BLACK wire will be the "Hot" lead and the WHITE wire will be the "Neutral" or "Common" lead. A GREEN or BARE COPPER wire is the "Ground". In older buildings it is always good practice to reconfirm the polarity of the wiring.
3. This fixture is designed to be mounted on a 'J' or 2x3 switch box. The box must be securely mounted to the structure of the building.

**FIXTURE INSTALLATION**

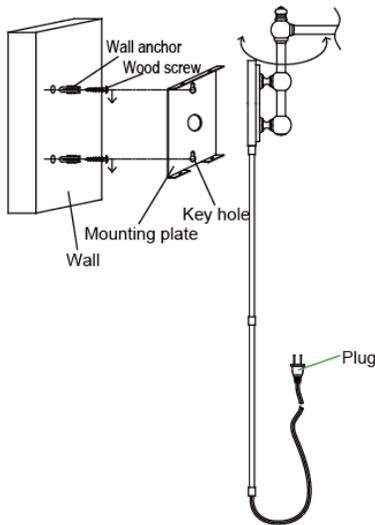

1. Remove the fixture and parts bag(s) from the carton. Before discarding the carton, double check packaging to make certain that all parts are found.
2. Attach mounting plate to the outlet box. (green screw should face the floor).
3. Fasten the bare copper fixture wire to the green or bare copper wire in the box or bare copper wire in the box to the crossbar with green screw provided. **NEVER FASTEN THE GROUND WIRE TO THE BLACK OR "HOT" WIRE! FAILURE TO FOLLOW THIS INSTRUCTION COULD RESULT IN SERIOUS INJURY OR DEATH!**
4. Fasten the white fixture wire to the white wire in the outlet box. Fasten the wires to together with an approved fastener (wire nut). Starting about 1" below the fastener, tightly wrap connection with the electrical tape so that the tape seals the end of the fastener. Make sure that there is no exposed wire or strands that could cause a dangerous short circuit!
5. Connect the black fixture wires to the black wire in the outlet box. Fasten the joined wires as in step 4.
6. Place the back plate over the outlet box and fasten it by screws.
7. Install the lamp. This fixture rated for 75W lamp.
8. Attached the glass to the fixture, secure by 3 screws.
9. This family includes an adjustable arm.

**PORTABLE INSTALLATION**

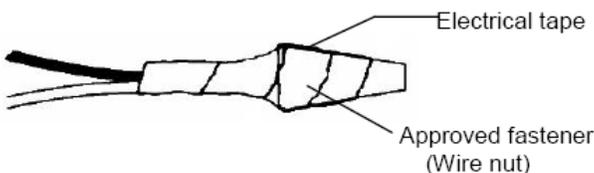

1. Remove the mounting plate from the back plate.
2. Determine location for the lamp. Using mounting plate as a template, mark the location of the holes for the wall anchors.
3. Drill the appropriate size holes for the wall anchors. (the holes should be slightly smaller than the size of the anchors.) Install the wall anchors to the hole. Screw in the wood screw to the anchors.
4. Install the mounting plate back to back plate.
5. Place the lamp to the wall, slip in the key hole in the wood screw.
6. Plug cord into wall outlet

For portable

Thank you for purchasing our lighting fixture.

Please clean with a soft, dry cloth ONLY! Do not use cleansers.

# INSTALLATION INSTRUCTIONS

1672

**IMPORTANT SAFETY INSTRUCTIONS:**

This portable lamp has a polarized plug (one blade is wider than the other) as a safety feature. This plug can be used in a polarized outlet only one way. If the plug does not fit fully into the outlet, reverse the plug.

If it still does not fit, contact a qualified electrician.

Never use with an extension cord unless the plug can be fully inserted.

Do not alter the plug.

**NOTE:** The important safeguards and instructions outlined on this sheet are not meant to cover all possible conditions and situations that may occur. It must be understood that common sense, caution and care are factors that cannot be built into any product. Caution and care must be supplied by the person(s) installing, operating and maintaining this lighting fixture.
