### INSTALLATION

---

- STEP 1.** Thread the wire through stems and canopy then twist tightly onto body. Keep adding additional stems required.
- STEP 2.** Pull the wires out from the outlet box, and install mounting plate onto the outlet box using the (2) mounting screws. Strip the fixture wires 1/2" long at the ends.
- STEP 3.** Trim excess wire to min 6" beyond stem, strip to 5/8" and twist.
- STEP 4.** Fasten bare ground wire to ground wire from the wall outlet box (usually green or copper color) or connect ground wire to green screw on the mounting plate.
- STEP 5.** Connect the neutral (white) fixture wire coming from the fixture base to neutral (usually white) outlet wire. Fasten both wires together with a plastic wire nut and tightly wrap the wire nut with electrical tape.
- STEP 6.** Repeat the previous step with the hot (black wires). Make sure there are no exposed wires or strands that could cause a dangerous short circuit.  
**FAILURE TO CONNECT THE APPROPRIATE WIRES CORRECTLY COULD RESULT IN SERIOUS INJURY OR DEATH!**
- STEP 7.** Carefully place connections back into the outlet box.
- STEP 8.** Mount the canopy to the mounting plate and secure with mounting nuts.
- STEP 9.** Install the lamps. The fixture is rated for 60 watt type G40 lamp. **DO NOT EXCEED RECOMMENDED WATTAGE!**
- STEP 10.** Restore power to the circuit at breaker or fuse box.
